

9M15 Press Release

ILC Inversiones and Subsidiaries

November 23rd, 2015

I. HIGHLIGHTS

- As of September 2015, ILC recorded an operational result of US\$130,868 thousand, 8.7% higher than the US\$120,358 thousand achieved in 9M14, mainly driven by the 114.2% improvement in the operating result of the Insurance Activity.
- In September 2015, ILC's Life Insurance Company Corpvida changed its name to Confuturo.

II. INTRODUCTION

Since 2011, Inversiones la Construcción (hereinafter "ILC Investments" or the "Company") discloses its Financial Statements in accordance with International Financial Reporting Standards ("IFRS"). Currently, the Company breakdowns its reports in two segments: the first one is the Non Insurance Activity, which includes AFP Habitat, Isapre Consalud, Red Salud and Others; whereas the second segment corresponds to the Insurance Activity which incorporates Confuturo, CorpSeguros and Vida Cámara.

III. MARKET INFORMATION

Ownership Structure as of September 2015

• Stock Price vs IPSA Evolution (Since the IPO until September 30th 2015 = base 100)

• Dividends

ILC has maintained a dividend policy consisting in distributing between 60% and 80% of its distributable net income. The amounts distributed since the IPO have been:

Year	Div. / Share	Dividend yield at \$7,061 (IPO Price)
2012	\$ 548	7.76%
2013	\$ 450	6.37%
2014	\$ 449	6.36%
Total	\$ 1,447	20.50%

IV. SIMPLIFIED STRUCTURE

ILC owns directly and indirectly the following companies:

CONSOLIDATED STATEMENTS

a. Net Income

As of September 2015, ILC reached a consolidated net income of US\$102,817 thousand. From this amount, US\$67,338 thousand is attributable to ILC, and the remaining US\$35,479 thousand corresponds to non-controlling participations. Net income for the controlling shareholder was 11.5% lower compared with the same period of 2014. It is important to note that ILC's Income Statement as of September 2014 includes the impact generated by the Tax reform in AFP Habitat, which was reallocated afterwards in the equity account as of December 2014.

Non Insurance Activity

Net income of the Non insurance activity was US\$78,366 thousand, 16.2% lower than the result generated in the first nine months of 2014 of US\$93,508 thousand.

This decrease is mainly explained by a decrement in the result of all subsidiaries, particularly in Consalud. This affiliate recorded a net loss of US\$872 thousand, US\$10,810 thousand lower compared to 9M14, because the additional revenues were not enough to offset the higher costs and operating expenses registered during the year. Regarding AFP Habitat, its lower result was explained by the 62% drop in the returns of its *encaje*¹. Finally, regardless the improvement in the operational performance of Red Salud, higher financial costs and other non-operational effects resulted in a lower income for the period.

Insurance Activity

The insurance activity registered a US\$24,451 thousand profit, higher than the US\$15,204 thousand recorded in the first nine months of 2014. This was mainly explained by better margins in annuities, as well as by a larger investment portfolio and higher financial results in fix income investments.

¹ In order to assure a minimum return for the pension funds (explained in the article 37 of the DL 3,500), the AFPs are required to hold an asset known as "encaje", which is equivalent to 1% of each of the managed funds.

b. Operating Income

Consolidated operating income reached US\$130,868 thousand, 8.7% higher than that of the same period of 2014. This was mainly explained by the improvement in the operational result of CGVC (CorpGroup Vida Chile).

Non Insurance Activity

Operating income of the Non insurance activity reached US\$110,777 thousand, remaining stable (-0.2%) compared to that recorded in 9M14. The strong decrement in the operating result of Isapre Consalud was offset by slightly better operational figures in the rest of the subsidiaries, in addition to the sell of one of ILC's real estate assets in Santiago, generating approximately a US\$5.5 million profit (net of taxes) in September 2015.

Insurance Activity

Operating income from the insurance activity reached US\$20,091 thousand, up from the US\$9,381 thousand profit registered in 9M14. Such progress responds mainly to better margins in annuities, as well as to a larger investment portfolio and a higher profitability in fixed income investments. The latter offsets the higher costs related to claims of the D&S insurance in Chile.

c. Non Operating Income

Consolidated non operating income amounted to US\$4,187 thousand, 83.6% lower than that of 9M14. This decrement is mainly explained by the lower profitability of AFP Habitat's *encaje*.

Non Insurance Activity

Non operating result from the Non insurance activity reached a US\$5,515 thousand loss, US\$26,221 thousand lower compared to that of 9M14. This was mainly the result of a 62% reduction year-on-year in the profitability obtained from AFP Habitat's *encaje*.

Insurance Activity

Non-operating income from the Insurance activity amounted to US\$9,702 thousand, which was 102.8% higher than the one reported in the same period of 2014. This responds primarily to lower adjustments in UF denominated debt, as well as to higher monetary corrections in US Dollar denominated instruments.

d. Balance Sheet

As of September 2015, consolidated assets of the company totalized US\$9,123,390 thousand and its composition is showed below:

ILC Consolidated	Figures in million Ch\$		Figures in ⁻	Th US\$(*)			
Balance Sheet	9M15	2014	9M15	2014	Var %		
Current Assets	248,304	220,764	 355,370	315,954	12.5%		
Non Current Assets	844,492	767,547	1,208,627	1,098,504	10.0%		
Insurance Activity Assets	5,281,899	4,852,844	7,559,393	6,945,335	8.8%		
Total Assets	6,374,695	5,841,155	9,123,390	8,359,794	9.1%		
Current Liabilities	328,012	214,017	469,448	306,299	53.3%		
Non Current Liabilities	402,920	430,149	576,654	615,624	-6.3%		
Insurance Activity Liabilities	4,943,774	4,508,435	7,075,472	6,452,421	9.7%		
Total Equity	699,989	688,554	1,001,816	985,451	1.7%		
Total Liabilities and Equity	6,374,695	5,841,155	9,123,390	8,359,794	9.1%		

(*) Closing Exchange rate of Ch\$698.72/US\$ as of October 1st, 2015

i. Current assets

As of September 30th 2015, current assets held by the Company increased 12.5% when compared to those as of year-end 2014. This increment is mainly attributable to the incorporation of the ACR6 Group, related to the consolidation process of Red Salud in May 2015, particularly regarding commercial debtors. The above was partially offset by a diminution in the cash and cash equivalents account.

ii. Non- Current assets

Non-current assets of the Company increased 10.0%, compared to those recorded as of December 31st 2014. The variation is mainly explained by Red Salud's ACR6 consolidation in May 2015 which increased the Properties, Plants and Equipments account. In addition, there were increases in the financial assets associated to AFP Habitat's *encaje* and capitalization advances in ILC's corporate building. All the above was slightly offset by a reduction in the Financial assets that use the participation method account.

iii. Insurance Activity Assets

As of September 30th 2015, Insurance activity assets were 8.8% higher compared to those as of year-end 2014. This variation is mainly associated with higher sales of annuities registered in both Confuturo and CorpSeguros. As a consequence, there was an increment in the cash and bank deposits account, mostly in mutual funds and derivatives guarantees, as well as by higher real estate and financial investments.

iv. Liabilities and Equity

As of September 30th 2015 the liabilities and equity of the Company amounted to US\$9,123,390 thousand, 9.1% higher than the figure reported as of December 31st 2014. This was mainly explained by two effects related with the Insurance activity; larger pension reserves due to increased sales and higher financial obligations with banks. Regarding the Non insurance activity, the increment in liabilities was primarily explained by the consolidation of the ACR6 Group which increased financial liabilities and accounts payables.

v. Equity attributable to owners of the parent and non-controlling interest

The equity attributable to owners as of September 30th 2015 reached US\$698,005 thousand, 0.7% lower than the amount as of December 31st 2014. Meanwhile, non-controlling interest reached US\$303,811 thousand, 7.5% higher than the amount as of December 31st, 2014.

....

V. BUSINESS UNITS

Net income (previous to *encaje*) reached to US\$69,867 thousand, 37.9% higher than the result obtained in the same period of the previous year. The composition of the main accounts is the following:

Habitat	*Figures in TI	n. US\$

(*) Closing Exchange rate of Ch\$698.72/US\$ as of October 1st, 2015

(**) EBITDAE is calculated as Profit before taxes minus depreciation, financial costs, other non operational costs and financial income due to Habitat's encaj

Revenues

E

Operating revenues increased 9.1% compared to those of 9M14. This was mainly due to a larger income from fees, related to the 3.1% increment in real terms of the average salary quoted by AFP Habitat, as well as by the 9% increase in the balances of voluntary savings managed, and the 8% increment in the number of pensions paid. All the above offset the 0.8% decrease in the average number of contributors of AFP Habitat in 2015 over the same period of 2014.

Habitat Peru registered US\$6,800 thousand in revenues as of September 30th 2015 and totalized 607,872 affiliates, achieving 10.3% of market share and US\$348 million in AuM.

Selling, General and Administrative Expenses

Selling and administrative expenses for the period reached US\$73,934 thousand, 17.2% higher than the comparable period. This was mainly explained by the 21.7% increment in personnel expenditures, as well as by advertising campaigns, mobile branches and IT expenditures undertaken in 2015.

Non Operating Income

Non operating income for 9M15 reached US\$19,219 thousand, down 55.9% when compared to that of 9M14. This was mainly explained by the 62% reduction in the profitability of the *encaje*, in line with the results of the investments in pension funds managed by the Company. For example, as of September 30th 2015 the annual return of the C Fund of the pension industry in Chile was 0.99%, compared with the 11.2% reached by the same Fund in September 2014 (in the case of AFP Habitat, annual return of the C Fund decreased from 11.6% in September 2014 to 1.54% in September 2015).

Operating Data

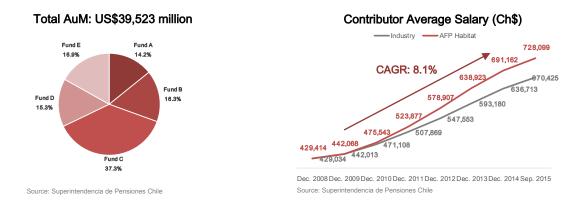

As of September 2015, AFP Habitat maintained a solid position in the Chilean pension industry, with approximately one fifth of market share in terms of contributors, account holders and assets under management.

	AFP Habitat	Market Share
	September '15	(%)
N° Account holders	2,060,573	20.7%
N° Contributors	1,222,820	22.3%
Contributors/Account holders	59.3%	
Assets under Management (Million Ch\$)	27,615,318	26.0%
Assets under Management (BUS\$)	39.5	26.0%

Source: Superintendencia de Pensiones

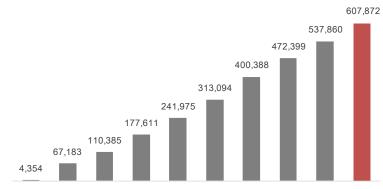

(*) Closing Exchange rate of Ch\$698.72/US\$ as of October 1st, 2015

Regarding Habitat's assets under management (AuM), the C and A Funds represent the largest and lowest allocations, respectively. In addition, average salary per contributor has continued an upward trend, with AFP Habitat outperforming the industry average by 8.6% as of September 2015.

The revenues of AFP Habitat are mainly explained by mandatory contributions, which represented 95.8% of the total. However, voluntary contributions have been gaining share over the last periods. As of the end of September 2015, Voluntary Pension Savings (APV), Voluntary Saving Accounts (CAV) and programmed withdrawals represented 3.1%, 1.9% and 1.4% of revenues respectively.

As of September 2015, AFP Habitat Peru reached 607,872 active affiliates, achieving 10.3% market share.

(**) EBITDA is calculated as profit before taxes minus depreciation, financial costs, other non operational costs and financial income

Revenues

Revenues experienced a 7.2% increase when compared to those as of 9M14. This was mainly explained by the 4.6% increment in the value of the UF during 2015 (approximately 85% of Consalud's contributors have a healthcare plan linked to the UF), as well as by the 0.6% increment in the number of average contributors in relation to 2014. Finally, there was also a positive effect in revenues due to the increase in the contribution cap, which rose from 72.3 to 73.2 UF, thereby increasing the contribution of members in the higher income segment.

Cost of Sales

The 12.4% increment in the cost of Consalud was explained by an increase in the cost per beneficiary. It is important to highlight the 5.7% increment in the inpatient cost as well as the 5.7% increase in the number of inpatient services registered during 2015. Regarding outpatient services, there was a 9.3% and a 0.8% increment in the frequency and cost respectively. Finally, the number of temporary disability insurances increased by 7.6% in the period, showing a 7.3% increment on its average cost.

Selling, General and Administrative Expenses

Administrative expenses in the first nine months of the year increased 5.2% year-on-year, mainly due to higher administration expenses, which were related to a larger staff, higher spending on leases, advertising and IT expenditures, among others. It is important to mention that as of the end of September 2015 there were 15,268 trials against Consalud due to adjustments in the base price established in health contracts, a 70% higher compared to those of the same period of 2014.

Non Operating Income

The non operating income showed a lower result of 18.8% over the same period of the previous year. This variation reflects a lower financial income, as well as higher financial costs.

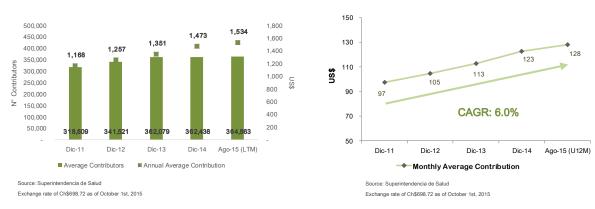

Operating Data

Over the last periods, contributions have continuously increased for both mandatory and voluntary modalities. These increments are explained by an upper contribution cap, a higher UF and a deeper formality of the labor market in Chile.

Th. US\$*	Dec -11	Dec -12	Dec -13	Dec -14	Aug - 15 (LTM)
Mandatory contributions	266,165	307,090	342,441	363,691	380,118

(*) Closing Exchange rate of Ch\$698.72/US\$ as of October 1st, 2015 Source: Superintendencia de Salud

During the last periods, Isapre Consalud has increased its number of contributors, as well the personal contributions, reaching US\$1,534 annually as of September 2015. This amount implies an average contribution of US\$128 per month by contributor.

Regarding operating costs, there has been an upward trend in each one of its items: inpatient and outpatient services, as well as temporary disabilities insurances.

(**) EBITDA is calculated as profit before taxes minus depreciation, financial costs, other non operational costs and financial income

Revenues

During the first nine months of 2015, income increased by 28.4% year-on-year mainly explained by higher revenues in all healthcare units, especially in Clínica Bicentenario (23.3%) and Clínica Avansalud (13.8%). Moreover, there was also a positive effect resulting from the consolidation of the ACR6 Group in May 2015, which increased operational revenues by US\$40,528 thousand.

The operational income of the inpatient activity recorded a significant increase, continuing the upward trend of the recent years. This segment registered a US\$38,803 increment compared to that of 9M14 (of which US\$23,669 correspond to the consolidation effect of the ACR6 Group in May 2015). This was mainly due to a higher activity in the intensive care unit, a higher number of surgeries and hospitalizations, the increase in surgical staff fees, and the use of additional medical supplies and drugs. All the above represented roughly 80% of the variation year-on-year. The US\$23,907 thousand increment in the outpatient activity (of which US\$16,491 correspond to the consolidation effect of the ACR6 Group in May 2015), was driven by an increase in the demand for images, laboratory and dental services, medical and urgency consultations. All the above explained roughly 95% of the deviation year-on-year.

Cost of Sales

The 28.6% increase registered in 9M15 was mostly driven by a higher activity level, as well as by the consolidation of the ACR6 Group in May 2015 which implied US\$30,458 thousand of additional operational costs. It is important to highlight that the only unit that achieved a cost reduction in the period (over revenues) was Clínica Bicentenario.

Selling, General and Administrative Expenses

The 37.5% increase is primarily explained by the consolidation of the ACR6 Group in May 2015 which implied additional expenses for US\$6,479 thousand. In addition, there were higher expenses related to administrative staff in response to the increment registered in the number of employees, maintenances undertaken over the period and IT expenditures.

Non Operating Income

During 9M15 there was a US\$11,899 thousand non operating loss, which is 2.5% higher than that of 9M14. This was mainly explained by higher financial costs resulting from inflation effects on Red Salud's UF denominated debt, as well as by the US\$1,513 thousand resulting from the consolidation of the ACR6 Group in May 2015.

Operating Data

As of September 2015, Red Salud has shown an improvement regarding its operating performance. This responds to a higher level of activity in its private hospitals, especially at Bicentenario and Avansalud.

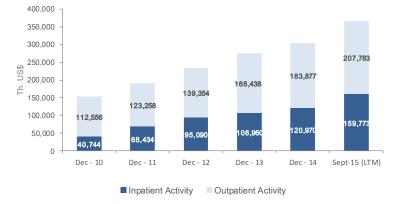

Operational Data (*)	9M15	9M14
Emergency consultations	190,542	107,634
Hospital discharges	46,448	34,744

(**) Includes technical margin and investments results.

Gross Profit

The lower gross profit of 9M15 was primarily due to the weaker performance of the D&S (Disability & Survivorship) in Chile, as a consequence of larger reserves recognitions (due to the decrease in the discount rate), increases in the number of claims and lower investment returns. However, the D&S Peru decreased its gross loss due to the improvement in the rate obtained in the second tender that came into effect in January 2015, as well as the additional reserves released in Peru as a consequence of the end of the previous D&S tender.

It is important to mention that reserves associated to D&S insurances are related to sale rates of annuities, which have been increasing over the last months (although a certain lag). This effect is largely explained by a regulatory change in the methodology to calculate discount rates for accounting annuities, which results in a higher sale rate.

Operational Expenses

The 11.8% reduction in year-on-year expenses responds mainly to the 9% reduction in both personnel expenses and administrative expenditures. This responds to several initiatives taken by the company to control costs and expenses. For example, the decrement in the salaries of Vida Camara Chile responds to outsourcing procedures undertaken by the company, in products related to Health and Life Insurance.

Non Operating Income

The 43.3% increment year-on-year is mostly related to exchange rate effects over the Peruvian sol (and its respective consequence on investments in Peru), as well as by the inflation effect over assets valued in UF.

Operating Data

As of September 2015, Vida Camara has continued a steady growth in the number of supplementary health insurance beneficiaries, reaching 240,186 people.

CORP GROUP VIDA CHILE S.A.

confuturo corpseguros

Consolidated earnings achieved by Corp Group Vida Chile were US\$21,947 thousand, which were 83.1% higher than those obtained in 9M14. The composition of the main accounts is as follows:

(*) Closing Exchange rate of Ch\$698.72 as of October 1st, 2015.

Revenues

The 47.9% increase in revenues from insurance activities is mainly due to higher premium collections in response to a regulatory change in the methodology to calculate discount rates for accounting annuities, which results in a higher sale rate. Regarding the net investment income of the insurance activity, there was a 4.8% advance which is mainly due to a better result in fixed income and leasing instruments, and its respective accrued interests due to a larger portfolio.

Cost of Sales

The 27.9% increase year-on-year responds mainly to additional costs related to higher collection of annuities, which has associated an accounting effect that increases reserves.

Operating Expenses

The 42.9% increase in year-on-year operating expenses responds mainly to a higher activity, as well as by larger deteriorations and operational expenditures.

Non Operating Income

The Non insurance segment presented a 76.8% diminution year-on-year related to a lower tax credit registered during 9M15. Meanwhile, in the Insurance segment, there was 160.6% increment due to inflation adjustments and higher profits in equity investments.
